

PROMOTING HUMAN DEVELOPMENT

New Ways Nutritional Nursery Schools Project

Why should you help??

For a child to fully develop they require good quality nutrition in the first 6 years of their lives.

It **Costs £1.25** a week (Less than £8 per month) to feed a child 2 meals a day six days at our Nutritional Units.

New Ways operates in Turkana Northern Kenya which is experiencing difficult conditions. They frequently experience droughts and we are seeing the number of children at our nursery schools increase. They need food to survive and they need your help. £5 a month can change lives.

Keep a smile on these children's faces by ensuring they will get fed in 2015.

We feed over 2,000 children every year and every penny helps.

A massive and sincere thanks for contributing to this important project
Angela Docherty CEO New Ways
